

Ensuring Future Growth

Feronia Forward works with the next generation to develop a love, appreciation, and understanding of our forests. We feel that we have a responsibility to teach children to value forestland so we can ensure that there will always be a generation of people working to protect our natural resources.

Feronia Forward is a 501(c)3 non-profit that works with a wide range of schools to invite students to step away from the computer screen and into the natural wonderland that we have conserved. Feronia Forward sponsors students to visit alternate energy farms, learn about sustainably tapping trees, discover the allure of untainted forestland, and even climb through the air on a ropes course that has been built in a forest without disrupting a single tree.

We hope to teach children the importance of conservation and let them discover the joy that awaits them in nature. Join us.

Now I see the secret of the making of the best person. It is to grow in the open air and to eat and sleep with the Earth. - WALT WHITMAN

Conserving Together

Feronia Forward partners with schools in low-income and urban areas to offer reward and incentives for students who perform well in class. In our Conserving Together program, Feronia Forward teams up with schools to create a set of standards for the students to strive for; when students in a class meet these goals, the entire class is able to spend a day of excitement, learning, team-building, and fun at Ramblewild: a 1400+ acre conservation forest that offers experiential outdoor education. Our goal is for students of every background—who may not necessarily have easy access to forestland—to experience first-hand the wonder of nature, the promise of conservation, and the reason we all should come together to protect it. In addition to Conserving Together, Feronia Forward funds a series of community projects to connect students with our forests, working with local schools to incorporate Feronia Forests' approach to sustainable forestry in their curriculum, and reward individual scholastic achievement as well the mentoring of younger students.

NATURE DEFICIT DISORDER:

Feronia Forward also aims to address the concern that today's youth spend too much time in front of a screen instead of experiencing nature. This is particularly true for disadvantaged youth who often lack the means to visit the great outdoors and it has been linked to obesity, attention disorders, and depression amongst child advocacy experts. We want to help address this.

The Feronia Experience

Challenge yourself and build lasting relationships with friends and nature on the ropes course at Ramblewild.

See first hand how sustainable products like maple syrup and maple water are made and how they're helping to preserve our trees.

Visit an active wind farm on Brodie Mountain and gain insight into where alternate energy comes from.

Explore and discover over 1,400 acres of meticulous conserved forest land in the heart of the Berkshires.

FERONIA FORESTS

Feronia Forests is a Certified B Corporation dedicated to preserving forestland for current and future generations. Recipient of the 2013, 2014, & 2015 B Lab 'Best for the Environment' Award, Feronia Forests is dedicated to smart, sustainable conservation that protects forests by using them; by tapping trees for water and syrup, building eco-friendly aerial trails, and creating natural spaces for fun and wonderment, Feronia Forests protects nature by encouraging others to participate in it. Together, everyone wins.
